

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. My family has benefited immensely from the "Do Not Call" law. We no longer drop what we are doing to go running to answer the phone, only to find out it is an unwanted telemarketer calling. We used to receive these calls day and night and they were constantly interrupting our family's time together. Since the law went into effect we have virtually received NO unwanted solititations.

As a Hoosier who is very grateful for this law, I request that you do not allow anything to interfere with our rights to choose NOT to be harrassed by telephone. Only those people who put their names on the list are affected and those who desire the calls are not impared in any way from receiving them. This seems like a fair and equitable solution for all involved. Thank you!
